The MD/CMDs,

All Discoms

Subject: Data Uploading in Urban Feeder Monitoring System in NPP and URJA App
- Important

Sir/Madam,

As you are aware that as per the directive of Ministry of Power a National Power Portal (NPP) has been developed by National Informatics Center (NIC) for convergence and better monitoring of power sector related data. On-line Urban Feeder Monitoring System as a part of NPP, has been in the focus and Urban Feeder Data is being uploaded from Discoms. Further URJA App for enhanced consumer-connect and information dissemination has already been in use in all platforms for past six months.

In the NPP review meeting held on 31st Jan 2017, Secretary (Power) has given the directive to make the portal, public. The data for URJA App, which is derived from D1 to D7 reports generated by the IT system deployed at Discoms, is already in public domain. Both the datasets are subjected to public viewing and hence have to be coherent. Thus these data should be rigorously checked before uploading to maintain its requisite quality in respect of timeliness, completeness and accuracy.

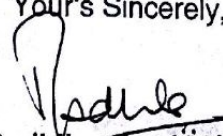

Your personal intervention is requested to ensure the following to avoid Data anomalies,

- All the Feeders of the towns are posted in NPP Data so that there is no mismatch between Town-wise AT&C Loss calculated in NPP vis-à-vis D1 Report, which is also used in URJA App.
- Ensure uploading of all the Feeder Data both in NPP as well as in D1-D7 (IPDS Portal) by 1st of every month.
- All the consumers are properly GIS Mapped with respective feeders and Delta-Change updates are done regularly
- Consumer Database in GIS system and MBC are synchronized
- All the Feeder are communicating with MDAS and their Meters, Modems and connectivity issues are addressed
- Minimize abnormality in Feeder Data like Energy and Billing/Collection Amounts, Outage Duration, etc. that leads to abnormal AT&C Loss and SAIDI/SAIFI Values

We look forward to your team's participation in the above and request your continued support and active guidance therein to ensure regular uploading of Quality Feeder Data of your Discom to make the URJA App and Feeder Monitoring System, a grand success. This will go a long way in ensuring transparent and accountable systems.

Thanking you,

Your's Sincerely,

(Radhika Jha, IAS)
Executive Director (IPDS)

CC: For kind information, please.
